Pajaro Valley
Nurseries

PRICE LIST
1905 - 1906

JAMES WATERS, Proprietor
WATSONVILLE, CAL.

TO CORRESPONDENTS

ANNUAL PRICE LIST

OF THE

Pajaro Valley Nurseries

OF

FRUIT AND ORNAMENTAL TREES,
SMALL FRUITS, EVERGREENS,
ROSES, PALMS, ETC.

SEASON OF 1905-1906
NOVEMBER 1, 1905

Oldest Nursery in California
Fortieth Year

JAMES WATERS, PROPRIETOR
WATSONVILLE, SANTA CRUZ COUNTY, CALIFORNIA

Location of Nursery
PAJARO DEPOT, ON LINE OF SOUTHERN PACIFIC RAILROAD

TO CORRESPONDENTS.

1st. The articles in this list will be furnished at the prices named only when the specified number is taken, except as follows: Five will be furnished at the ten rate, fifty at the hundred rate, and five hundred at the thousand rate. Long lists of selected varieties of less than five each will be charged at the regular retail rates.

2nd. All orders should be written plainly on separate sheets of paper, and not mixed up in the body of the letter. By doing this, much trouble will be saved us, and the possibility of mistakes much less liable to occur.

3rd. Give full and plain instructions as to how packages shall be marked and by what route shipped. When no route is mentioned, we use our best judgement in forwarding all orders. We cannot be held responsible for the accidents or delays of transportation. All articles after being delivered to the forwarders in good condition, are entirely at the risk of the purchaser. Except in case of accident or gross carelessness, our packages will endure the longest journeys in perfect safety.

4th. All trees and plants are carefully labeled and the packing is performed by experienced workmen, in the most thorough manner. A moderate charge is made, covering cost of material used, but no charge is made for the conveyance of packages to the railroad station.

5th. Our customers are requested to notify us as soon as possible of any errors made in filling their orders, so they may be rectified immediately, as we desire to conduct our business in such a manner as to merit the esteem and confidence of all who may give us their patronage.

6th. All orders from unknown correspondents should be accompanied by a remittance or satisfactory reference.

7th. Remittances may be made by drafts on Watsonville or San Francisco Banks, Post Office or Express Money Orders on Watsonville, on cash by express prepaid. All letters requiring information will be promptly answered.

All communications should be addressed to

JAMES WATERS,

Pajaro Valley Nurseries,

Watsonville, California.

DISTANCES FOR PLANTING.

Distances Between the Trees in Plantation—The distance which trees should be planted apart should vary with the richness of the soil. On moist alluvial soil, the distance should be greater than on higher and poorer lands. Apples, 25 to 30 feet apart each way; Pears and Cherries, 20 feet apart each way; Dwarf Pears may be planted as close as 12 feet; Apricots and Almonds, 18 and 20 feet apart each way; Plums, Peaches, and Nectarines, 16 and 20 feet apart each way; Quinces, 12 to 15 feet apart each way; Currants and Gooseberries, 4 to 6 feet apart each way. Raspberries and Blackberries should be planted in rows, the rows 6 to 8 feet apart.

Number of trees required to plant an acre, at various distances apart, square method:

1 foot apart each way	-----	43,560
2 feet apart each way	-----	10,890
4 " " " "	-----	2,723
6 " " " "	-----	1,210
8 " " " "	-----	680
10 " " " "	-----	435
12 " " " "	-----	302
14 " " " "	-----	222
16 " " " "	-----	170
18 " " " "	-----	134
20 " " " "	-----	108
25 " " " "	-----	70
30 " " " "	-----	48

To estimate the number of plants or trees to be planted in Square Method, multiply the distance between the rows by the distance between the plants, which will give the number of square feet allotted to each plant. Divide the number of feet in an acre, [43,560] by this number, which will give the number of plants or trees required for an acre.

Planted in Equilateral Triangle Method—Add three ciphers to the number of plants or trees required "Square Method" and divide by the decimal .866, which will give the number required.

NOTICE TO CUSTOMERS.

We would say to those unacquainted with our establishment that this is the fortieth year of our existence, the nursery having been under one management during all of this time. We have about eighty acres in trees and would respectfully solicit correspondence and personal inspection of our stock, which is grown entirely without irrigation, and we are confident that it will compare favorably with the best.

The stock of trees we have to offer this year is very large and complete. They are exceptionally fine and well grown, and will, I feel confident, give entire satisfaction. My aim and intention has always been to deal fairly and squarely with all my customers. That these efforts have been crowned with success is evident by the steady increase from year to year of our business, until it has reached its present magnitude. It is our purpose to continue this honest dealing with all, not only to hold our present large business, but with the hope to still further increase it.

Our Nursery

is situated in the Pajaro Valley, adjoining the Pajaro Depot on the line of the Southern Pacific Railroad, which gives the advantage of good and rapid shipping facilities to all parts of the State. Those, from all points, wishing to visit the Nursery, can do so by taking the S. P. R. R. trains and getting off at Pajaro. The Nursery is located three hundred yards from the station.

Guarantee of Genuineness.

We give our personal attention, and exercise our utmost care and diligence to have all our trees, etc., true to label. Should mistakes occur, on the proper proof, we hold ourselves in readiness to make them good, so far as replacing all that may not prove true, or refunding amount paid for same. But it is mutually agreed between the purchaser and ourselves, that we will in no way be liable for a greater sum than that which was originally paid for the trees, etc.

APPLES.

Preference must be given to the Apple above all other fruit of temperate climates. Although it may not possess the rich, melting, and delicious qualities of the pear, apricot, and peach, it is more desirable, because it can be had quite, or nearly all the year, when the several varieties which ripen in succession are planted.

There is, perhaps, no fruit which is more universally used among all classes, both rich and poor, than apples. It appears to fill a place that no other fruit can fill. There are few countries where it attains to greater perfection than in the coast counties of California, and it is to this part of our State that we must, in the future, look for our supply of this indispensable fruit.

The profits now derived from an orchard of well selected varieties of apples should be ample to satisfy all reasonable men. Notwithstanding the many thousand trees planted every year, the demand for the fruit keeps pace with the supply, from which we are strongly of the belief that there may be no fear of an over-production.

The selection of varieties must be left entirely with the planter, as the diversity of our soil and climate is such that a variety well adapted to one locality will be almost worthless in another. In planting an orchard for market, but few of the very best varieties are wanted. The great number of kinds or varieties now presented makes the selection a most difficult task, for nearly all have their advocates. Look around you into the orchards planted in your vicinity; ascertain which are doing best, are most productive and best for the market. In this way you may be able to select the most profitable varieties to plant.

The varieties named in this catalogue have, from time to time, been selected after an experience of forty years in the nursery and fruit-growing business. The list, I know, is very long, and while all may not be suited to this or any one locality, from the list may be selected varieties which will be well adapted to many parts of the State to which our business has extended. The old, well-tried varieties, such as Gravenstein, Bellefleur, Newtown Pippin, Red Pearmain, W. W. Pearmain, etc., can always be relied on as a profitable market apple, and are good varieties for a commercial orchard if known to succeed well in your locality. Plant largely of these kinds, rather than some new or untried variety of which you may know but little; a few of these may do in the way of experiment, when, if found profitable, the orchard can be extended. This is a subject fraught with vital interest to the party who is just starting in the business of fruit-growing—a rock upon which is wrecked his future hopes, if he has made an injudicious selection. How important is it then to the novice, in this, the first step, that he proceed with the utmost caution and the very best of judgment.

PRICE LIST

OF

PAJARO VALLEY NURSERIES.

1905-1906.

APPLE TREES.

Clean, smooth and entirely free from Aphs.

	Each	10	100	1000
Two years old, 6 to 7 feet	20c	\$1.75	\$15.00	\$120.00
One year old, 4 to 6 feet	20c	1.50	12.00	100.00
One year old, 2 to 4 feet	15c	1.25	10.00	80.00

Summer Apples.

A. S. Pearmain,	Early Harvest,	Gravenstein,
Red June,	Red Astrachan,	Lyman's Large Summer,
Summer Queen,	Summer Rose,	Summer Pippin.

Autumn Apples.

Alexander,	Fall Pippin,	Duchess of Oldenburg,
Fameuse,	Golden Russet,	Hoover,
Rambo,	Skinner's Pippin,	Seek-No-Farther.
Tompkins Co. King,	Twenty-ounce,	

Winter Apples.

Buckingham,	Ben Davis,	Baldwin,
Baltimore Red,	Bellefleur, Yellow,	Esopus Spitzenburg,
Bismarck,	Fallwater,	Grimes Golden,
English Golden Russet,	Hays,	Jonathan,
Gloria Mundi,	Lawyer,	Lady Apple,
Kentucky Red Streak,	Minkler,	Missouri Pippin,
Lady's Sweet,	Newtown Pippin, Yellow,	Northern Spy,
McIntosh's Red,	Pomme Grise,	Rhode Island Greening,
Pewaukee,	Red Sweet,	Red Pearmain,
Rome Beauty,	Smith Cider,	Stark,
Romanite,	Utter's Red,	Vandevere,
Talman Sweet,	Wagener,	Winesap,
Virginia,	Walbridge,	Wealthy,
White Winter Pearmain,		

New Apples of Recent Introduction.

Arkansas Beauty,	Arkansas Black,	Colton,
Delaware Red Winter,	Huntsman,	Hatcher,
Ingram,	Kinnaird's Choice,	Langford,
Mammoth Black Twig,	Marshall's Seedling,	Nonnetitt,
Reinette Superfine,	Reinette du Canada,	Red Bietigheimer,
Stump Apple,	Walsh Seedling,	York Imperial,

CRAB APPLES.

Hyslop,	Red Siberian,	Transcendent.
Yellow Siberian,		

The Siner Apple.

After having been given a thorough trial, this New Apple is now introduced to the public with the very greatest confidence that it will meet with that success which its beauty and extremely fine quality so deservedly merit. The original tree has now been in bearing about seven years. It is a very strong rapid grower, of spreading habit, and is enormously productive. Fruit large oblong, deep yellow ground, mostly covered with bright brilliant red, skin smooth and glossy, one of the most beautiful apples, juicy, of delicate vinous flavor, a remarkably long keeper, keeping in good condition perfectly sound and juicy until well into late summer.

I have only a limited number of trees to offer this season at the following prices:

	Each	10
Two years old, 5 to 6 feet	\$1.00	\$8.00
One year old, 4 to 6 feet75	6.00
One year old, 3 to 4 feet50	4.00

Apples on Aphis-Proof Stock.

Four years ago, being fully aware of the injury being done to apple trees by the very great increase of the greatest of all apple tree pests—Woolly Aphis—I had erected at considerable expense a Fumigating House, in which all apple trees before leaving the Nursery have been thoroughly fumigated with hydrocyanic acid gas. While this enabled one to furnish trees absolutely free from pest, I found that after the trees had been planted a few years they would show signs of Aphis, presumably from old orchards. To off-set this I am now engaged in growing apple trees on what is known as resistant roots, and in time hope to use no other.

This year I have a few thousand of these trees to offer for sale, and will be pleased to enter into contracts to furnish them in large quantities in the very near future. It must be very plain to all apple growers that if we desire to continue the business of growing apples, and prolong the life of our apple orchards, we must plant only on Aphis proof roots.

The following prices may appear to be very high when compared with

the prices for apple trees on common seedling roots, but when we take into consideration the great length of time and expense required to grow apple trees on resistant roots, as it takes three years to grow one year old trees, it will be seen that the prices are quite reasonable.

	Each	10	100
Two years old, 5 to 6 feet40c	\$3.00	\$25.00
One year old, 4 to 6 feet35c	2.50	20.00
One year old, 3 to 4 feet30c	2.00	18.00

Bellefleur,
Carlton (New),
John Sharp (New),
W. W. Pearmain,

Esopus Spitzenburg,
Gravenstein,
Marshall Seedling,

Newtown Pippin,
Missouri Pippin,
Red Pearmain.

PEAR TREES.

On French Seedlings.

	Each	10	100
Two year old, 5 to 6 feet25c	\$2.00	\$17.50
One year old, 4 to 6 feet25c	1.75	15.00
One year old, 3 to 5 feet20c	1.50	12.50

Summer Pears.

Bartlett,
Dearborn Seedling,
Madeleine,
Souvenir du Congress,

Beurre Gifford,
Keiffer's Seedling,
Rostizer,

Buffum,
Le Conte,
Tyson.

Autumn Pears.

Buerre Hardy,
Belle Lucrative,
Duchess d'Angouleme,
Doyenne du Comice,
Oswego Buerre,

Buerre Superfine,
Bossock (Doyenne),
Flemish Beauty,
Seckle,
Idaho,

CHERRY TREES.

On Mazzard Roots.

	Each	10	100
Two years old, 4 to 6 feet	30c	\$2.50	\$20.00
One year old, 4 to 6 feet	30c	2.50	20.00
One year old, 3 to 4 feet	25c	2.00	16.00

Heart Cherries.

Fruit heart shaped, with tender flesh. Trees of rapid growth, with large, soft, drooping leaves.

Black Tatarian,	Black Heart,	Belle Crown Tartarian,
Black Eagle,	Black Prolific,	Elton,
Early Purple,	Gov. Wood,	Knight's Early.
Ox Heart,		

Bigarreau Cherries.

These are chiefly distinguished from Heart Cherries by their firmer flesh. Their growth is more vigorous, foliage luxuriant, soft and drooping.

Bing,	Cleveland,	Centennial,
Kirtland's Mary,	Lewelling,	Murdock,
Napoleon Bigarreau,	Rockport Bigarreau,	Mezel (Great Bigarreau)
Tradescant's Black,	Windsor,	Yellow Spanish.

Duke and Morello Cherries.

The trees of these two classes are quite distinct from the preceding, being slower growers; leaves thicker and more erect, and of a deeper green. The fruit is generally round, and in color, varying from light red to dark brown, and is more acid.

Belle Magnifique,	Dyehouse,	Early Richmond,
Late Duke,	Reine Hortense,	McMurry.
Olivet,	May Duke,	

PLUM TREES.

On Myrobolan Roots.

	Each	10	100
Two years old, 5 to 7 feet	25c	\$1.75	\$15.00
One year old, 4 to 6 feet	25c	1.50	12.50
One year old, 3 to 4 feet	20c	1.25	10.00

Columbia,	Coe's Golden Drop,	Damson,
Daune's Purple,	Coe's Late Red,	Early Golden Drop,
Green Gage	Denninston's Superb,	Imperial Ottoman,
Imperial Gage,	Gen. Hand,	Jefferson,
Lombard,	Ives Autumn,	Lawrence's Favorite,
Peter's Yellow Gage,	Ontario,	Prince Englebert,
Quackenboss,	Peach Plum,	Sweet Damson,
Victoria,	Reine Claude Rouge,	Washington.

Plums, New and Rare.

Abundance,	Burbank,	Botan,
Clyman,	Dallas,	Dumiron,
Climax,	Kelsey's Japan,	Prunus Pissardi,
Glaister,	Simon (Prunus Simoni)	Wickson,
Satsuma (Blood Plum),		

PRUNE TREES.

On Myrobalan Roots.

	Each	10	100
Two years old, 5 to 7 feet25c	\$1.75	\$12.50
One year old, 4 to 6 feet25c	1.50	10.50

Bulgarian,	Fellenberg,	Early Yellow Prune,
Golden Prune,	German Prune,	Honey Dew,
Hungarian,	Robe de Sargent,	St. Martin's Quetsche,
Silver Prune,	Tragedy,	Waugenheim.

Prune Trees.

On Almond.

	Each	10	100
Two years old, 5 to 7 feet25c	\$2.00	\$15.00
One year old, 4 to 6 feet25c	2.00	15.00
One year old, 3 to 4 feet20c	1.50	12.50

French Prune—Sugar.

Prune Trees.

On Myrobalan.

	Each	10	100
Two years old, 5 to 7 feet25c	\$1.75	\$12.50
One year old, 4 to 6 feet25c	1.75	12.50
One year old, 3 to 4 feet20c	1.25	10.00

French—Imperial Epireuse,—Sugar. Puymirol D'Ente.

Imperial Epineuse (New)—This is said to be the largest prune of the French type. It dries well, either in the sun or Evaporator, running from 20 to 35 to the pound. Equally as sweet and of as fine flavor as the French Prune, its large size, beautiful color, and fine flavor, with the heavy bearing quality of the tree, will cause it to be extensively planted in all prune growing districts. The experimental stage of this prune has passed, as it has been thoroughly tested throughout the State.

Puymirol D'Ente.—This prune was introduced by Felix Gillet of Nevada City, from whom we obtained our buds. It is not quite so large as the Imperial, but much larger than the French; dries well in the sun, is of fine color, and delicious flavor; when better known will be extensively planted. Trees are strong thrifty growers, and exceedingly prolific bearers.

PEACH TREES.**On Peach Roots.****Free Stone Varieties.**

	Each	10	100
One year old, 4 to 6 feet	25c	\$2.00	\$18.00
One year old, 3 to 4 feet	25c	1.75	15.00

Peaches—Clingstone Varieties.

Henrietta,	Lemon Cling,	Newington Cling,
Nichol's Orange,	Runyon,	Sellers,
Phillips,	Cowles,	Tuscan,

Recent Introductions.

Triumph.—A very early, yellow peach; originated in Georgia; late bloomer; making it a sure and prolific bearer; tree a good grower; fruit very large; pit small; flesh, bright yellow color; skin mostly covered with red; excellent flavor; ripens with Alexander.

Admiral Dewey.—Another very early yellow peach from Georgia. The originator of these two varieties makes greater claims for the Dewey than the Triumph. It ripens with the Triumph; is a perfect freestone; flesh, uniform yellow color; has better form and a brighter color on the surface. It is equally hardy and productive; tree a strong symmetrical grower; one of the best early yellow peaches.

Blood Leaf Peach.—A great novelty. Originated in Pajaro Valley Nursery. Leaves and bark a deep blood red color. Tree a strong grower; very productive. Fruit medium size, freestone, of greenish red color; very sweet and juicy. A very beautiful and ornamental tree.

Cowles' Cling.—An extra large Clingstone; very late; bright golden yellow with a blush of light red on one side. Tree a strong grower, and exceedingly prolific bearer. Originated with Horace Cowles in this valley. Fruit is very large, fine flavor, juicy and sweet. Fine for canning.

NECTARINE TREES.

On Almond Roots.

	Each	10	100

Price50c	\$4.00

STRAWBERRY PLANTS.

Linda.— This Strawberry originated in the Pajaro Valley Nursery and was named by the proprietor. The six or seven hundred acres of strawberries in this valley are planted almost exclusively to this variety, which is proof enough of its great value, without any further praise from me. Plants are good growers, staminate, and exceedingly prolific. Berries of good size, firm, dark red color, seeds depressed, shape irregular, flavor delicious. A good shipper.

	100	1000
Price	\$1.00	\$5.00

Linda and Brandline.

LOGANBERRY PLANTS.

	10	100
Price	50c	\$4.00

One of the greatest berries ever produced. The fruit is as large as the largest sized blackberry, some specimens measuring one and one-half inches in length. It has the flavor of the blackberry and raspberry combined, it being a cross of these two fruits.

The Loganberry is no longer an experiment. I have been growing the fruit now for eleven years, and the demand for it exceeds my most sanguine expectations. Its earliness, large size, beautiful appearance, superior quality and delightful flavor, together with its firmness, and good carrying or shipping qualities, make it one of the most desirable berries for the market, and will at all times command the very highest market prices.

PHENOMENAL—New.

	10	100
Price	50c	\$4.00

A production of Luther Burbank. Fruit and vine somewhat like the Loganberry. Growth of vine same as the Loganberry. Fruit said to be larger, and a somewhat firmer berry; flavor very much like the Loganberry.

PRIMUS—New.

	10	100
Price	50c	\$4.00

Another production of Luther Burbank. This is the earliest of all berries, coming in very soon after strawberries are ripe. Vines trail upon the ground same as Loganberry and Phenomenal. Exceedingly productive. Fruit large; dark brown color and of a vinous flavor.

RHUBARB.

	10	100
Victoria—St. Martin's Champagne	\$1.50	\$12.50

DECIDUOUS TREES.

	10	100

Clotilde Soupert, light pink,	Yellow Rambler, dark yellow,
Mlle. Cecile Bruner, rosy pink,	Bengal,
Banksia, double white, double yellow, low,	Agrippana.

SINER.

This beautiful apple was discovered near the cabin of an old miner living near Columbia, Tuolumne Co., California, after whom it is named. No more beautiful apple ever grew and its beauty is equaled by its long keeping qualities; as it will keep nearly or quite a year under ordinary conditions. It is supposed to be produced from seed of the Esopus Spitzenburg, which it resembles. Its beauty and superior keeping and shipping qualities will render it one of the most valuable market varieties. Tree a strong, upright grower. An early, prolific bearer. Fruit large, entirely covered with beautiful red stripes; mild sub-acid flavor.
